

FOR IMMEDIATE RELEASE

Fogo Data Centers successfully completed an updated SOC2SM examination enhanced to include alignment of controls with HIPAA security rule for its Hosted Health IT Systems

Fogo Executives Have over 20 Years of Experience with HIPAA and Regulatory Compliance

Carrollton, GA, July 11, 2016 – Fogo Data Centers is proud to announce its successful completion of the Service Organization Control (SOC) 2SM examination enhanced with alignment of controls with the requirements to the HIPAA security rule 45 CFR Section 164.308, 164.310, and 164.312. The exam and report are designed to meet the needs of existing or potential customers who need assurance about the controls at a service organization that are relevant to security and availability. Mappings to HIPAA include the relevant administrative, physical, and technical safeguards to protect electronic protected health information (e-PHI).

Fogo Data Centers completed this most recent examination on March 9, 2016 as part of its commitment to providing the highest quality of products and solutions for clients in the healthcare, legal, and financial industries; as well as other clients dealing with security-sensitive or highly regulated information and data.

“We are pleased that our SOC 2SM report demonstrates our controls over the security and availability of our services,” said William G. Esslinger, Jr., CEO at Fogo Data Centers. “We want to make sure our clients are completely confident with the security behind the systems and resources we provide them”.

A SOC 2SM report is available upon request. Please contact Edith Haney for additional information.

About Fogo Data Centers

Fogo Data Centers (Fogo) delivers advanced cloud hosting technologies and world-class customer service for growing enterprises nationwide.

We deliver our products and services through a network of owner-operated SOC II, HIPAA compliant and PCI compliant regional data centers. We specialize in providing services to clients who are looking to enhance their IT infrastructure and partners seeking to increase revenue and provide expanded services to their end users.
